

Rorisang Kedijang

Bath, UK · rorisangkedijang14@gmail.com · linkedin.com/in/rorisang-kedijang · github.com/Righlow · Portfolio

PROFESSIONAL PROFILE

Final-year BSc (Hons) Creative Computing student at Bath Spa University, specialising in web technologies to design and build interactive, immersive digital experiences. Proficient across the full web stack — from Node.js and MongoDB backends to Three.js and custom GLSL shader frontends. Experienced in brand identity design, client-facing delivery, and translating complex ideas into polished, production-ready interfaces. Actively seeking graduate roles in creative development, front-end engineering, or UX-focused web development.

TECHNICAL SKILLS

Languages	JavaScript (ES6+) · HTML5 · CSS3 · C++ · GLSL
Frameworks	React · React Native · Node.js · Express · React Three Fiber · Three.js
Databases	MongoDB · Mongoose
Tools	Git / GitHub · Vite · Multer · Stripe API · Nodemailer · dotenv · Express-session
Design	Figma (hi-fi prototyping) · Adobe Illustrator · Brand identity · SVG
Concepts	REST APIs · MVC architecture · Authentication (session + bcrypt) · Responsive design · WebGL / Shaders · Audio-reactive UX

PROJECTS & CLIENT WORK

Perceptor — Interactive Client Pitch · MangoMoon × MIH Consulting 2026
HTML5 · CSS3 · JavaScript · Netlify · Scroll Animation · Interactive UI

- Designed and developed a fully interactive scroll-based pitch website for Perceptor, a knowledge management platform built for MIH Consulting
- Engineered animated section transitions, live stat counters, and a structured narrative spanning problem, solution, and workflow — communicating complex SaaS concepts (Knowledge Nuggets, semantic search, audit trails) through visual storytelling
- Delivered a polished, branded experience aligned to the MangoMoon design identity; live and client-approved at `perceptor.netlify.app`
- Worked directly with client briefs and iterated on feedback — simulating a real agency delivery workflow as a solo developer

Soniq Space — Audio-Reactive 3D Visualiser · Personal Project / BSc Final Year 2024–2025
Three.js · Node.js · Express · Web Audio API (FFT) · MongoDB · EJS · Multer · Session Auth

- Built a full-stack audio-reactive 3D visualiser where DJs create branded virtual rooms — geometry deforms in real time to bass, low-mid, high-mid, and treble frequency bands via Web Audio API FFT analysis
- Implemented a custom 3D room configurator: users control wall colour, camera radius, wave intensity, brand text, and floor plane height — all persisted to MongoDB via Mongoose schemas
- Engineered Multer-based audio and wall-texture file uploads with type/size validation; session-based authentication with admin role separation
- Rooms are shareable and exportable as JSON; bokeh particle system layers on top of the audio wave plane for visual depth
- Deployed with a GLTF speaker model rendered on the landing page using Three.js GLTFLoader; full responsive layout across desktop and mobile

Plandria — Sustainable E-Commerce Platform · Personal Project / BSc Final Year 2025–2026
Node.js · Express · MongoDB · Stripe · EJS · bcryptjs · CSS3 Custom Properties · ES Modules

- Full-stack e-commerce platform for an eco-conscious brand selling hand-crafted candles and pots — the product's unique hook: once the candle burns down, the ceramic vessel becomes a planter (two-life product concept)
- Implemented Stripe payment integration with a full cart, checkout, and order management flow; users receive order confirmation and admins can view all orders
- Production-grade authentication using bcryptjs password hashing, express-session, and role-based route guards separating user and admin access
- Admin dashboard: add, edit, and delete products; view and manage all customer orders — no code changes required
- Dual dark/light theme system built entirely with CSS custom properties; mobile-first responsive layout with hand-crafted Monstera leaf brand identity, animated illustrations, and a custom logo designed in Adobe Illustrator

MIH — Healthcare Technologies · Client Work · Moloele Investment Holdings Jun 2026
Node.js · Express · Nodemailer · Responsive Design · Brand Identity

- Built and shipped the corporate site for MIH's Healthcare Technologies division, Moloele Investment Holdings (Pty) Ltd, end-to-end — from brand system to backend
- Engineered a Node.js/Express enquiry API with rate-limiting, server-side validation, and Nodemailer delivery; diagnosed and fixed a production ENETUNREACH SMTP failure on Railway by forcing IPv4 DNS resolution
- Designed an elegant, editorial visual identity — custom pattern work, a navy/gold palette, and a bespoke elephant logo mark — carried across four core service pillars
- Fully responsive, production-deployed and live at `mih-healthcare.co.za`

1Life — Life Tracker & Habit App · Personal Project Feb – May 2026
React Native · Node.js · Express · MongoDB · Gamification

- Designed a Notion-inspired data model tracking interconnected daily habits across six life domains — physical, mental, financial, spiritual, emotional, and personal
- Built a gamified progression system — XP, streaks, and a growing 'life tree' visual — turning daily discipline tracking into a game
- Architected relational data components (daily entries, habit templates, reflections, milestones) with one-to-one, one-to-many, and many-to-many relationships

- Built with React Native, Node.js, Express, and MongoDB — designed for real-time recalculation across domains whenever a single habit updates

EDUCATION

BSc (Hons) Creative Computing — Web Technologies · Bath Spa University, UK Oct 2023 – May 2026

- Responsive Web Design & Creative Coding — responsive, accessible interfaces in HTML5/CSS/JS; REST API integration; data handling and responsive layout systems
- App Development with React & React Native — component architecture, state management, Git/GitHub, ES6+ patterns, async programming, API integration
- UX/UI Design & Interactive Media — high-fidelity Figma prototyping; C++ and OOP fundamentals; data-driven GUI development
- Creative Technologies — Three.js, WebGL, generative art with p5.js, audio-visual programming

BA Game Design — Year 1 (Transferred) · Eastern Mediterranean University 2022–2023

Awarded 120 credits toward current programme. Visual communication (Illustrator & Photoshop), analytical thinking, academic research methods.

National Senior Certificate (IEB) · Hilton College, South Africa 2021

Art [5] · English [5] · isiZulu [5] · Life Orientation [5] · Life Sciences [4] · Physical Science [3] · Mathematics [3]

EXPERIENCE

Kitchen Porter · Hotel Indigo, Bath, UK Jun 2024 – Oct 2024

- Collaborated with chefs in a high-volume, fast-paced kitchen environment; maintained composure and reliability under sustained pressure
- Upheld strict food hygiene and safety standards; managed stock rotation and supplier deliveries with close attention to detail

Receptionist / Personal Assistant · Dimela Health Pharmaceuticals, Johannesburg, SA May 2022 – Jul 2022

- Managed scheduling, external correspondence, and visitor management in a busy corporate healthcare environment
- Supported senior management with report preparation, presentations, and administrative coordination — developing professional communication and organisational skills

ADDITIONAL

Languages: English (native/fluent) · isiZulu (conversational)

Interests: Generative art · Electronic music & DJing · Sustainable design · Brand identity · Open-source creative coding
